GRADING: A grade will be given for each class session. Grades may be based upon any class activity. If a student is absent without excuse, he will receive a “0” for that day. The final test will count for one third of the semester grade. Work must be completed by due date to receive full credit. A late assigned project will result in one letter grade reduction for each day past due. Five absences will result in a course grade of “F.” (If a student cannot attend the class, he should arrange with the Dean’s office to drop). To complete the course, a student must demonstrate mastery of the EE outline, give evidence of knowledge of EE material, and complete all assignments. Anyone not mastering the EE outline will receive either an “I” or an “F” for the course regardless of other work done.

Note: All writing is to be prepared for grading using the grading rubric adopted by the faculty. All written work should be kept in a notebook to be turned in the last regular class period. This syllabus is dated 5/23/11. It may be changed to better meet class needs.
