BIBLICAL EVANGELISM 311
(Spring 2010)

COURSE DESCRIPTION: The course consists of class lectures and “on the job” training in personal evangelism. The program followed is Evangelism Explosion. Students who successfully complete the program will be eligible to serve as a trainer the following semester. After the successful completion of the second semester, students will receive trainer status. Students will participate in visitation (on the job training sessions) under the direction of a trainer who has completed the first semester of evangelism training.

COURSE REQUIREMENTS:

1. Read the EE textbook and complete assignments given in the EE notebook, and memorize the assigned memory work.

2. Keep a personal journal of all visits on a weekly basis. The journal should include the name of the person visited, your level of participation in the visit, the result of the visit, and the follow up steps taken to minister to the prospect. It should also include your evaluation of the visit and how it could be made more effective. (The instructor may ask to see your journal at any class session).

3. Read the biography of one evangelist and write a summary report of the biography.

WEEKLY SCHEDULE: Classes meet 6-10 p.m. each week except for scheduled breaks.

GRADING: A grade will be given for each class session. The grade may be based upon a test, assigned work, or class participation. If a student is absent without an excuse, he will receive a “0” or “F” for that day. If the absence is excusable, that day will not be averaged with the other 15 class sessions. The final test will count for one third of the semester grade. Work must be completed by due date to receive full credit. An assigned project turned in late will result in one letter grade reduction for each day that it is late. An assignment is considered late if it is not presented at the class on the due date. Five absences will result in a course grade of “F.” (If a student sees that he cannot attend the class, he should arrange with the Dean office to officially drop the course). To successfully complete the course, a student must demonstrated a mastery of the EE presentation, the test scores which evaluates the students knowledge of EE material, and completion of all assignments. Anyone not mastering the EE presentation will receive either an “I” or an “F” for the course regardless of other work done. It is essential that the presentation be memorized and mastered.
